RakworX MinoPOD system

Features & Benefits	
Air return system	Bottom air conditions greatly save the space in DATA center and reduce the energy consumption by shortening the airflow circle , ensure the high density IT equipment operation.
Smart busbar system	Convenient and simply mounted smart busbar system , easy for expansion , competitive price
Safe and reliable	Sliding door can automatically close, accessible by card or code, remotely control. Racks can be add RakworX electrical locker for improving data center safety
Remote control	Users can access, configure, and control through RakworX PDUs through secure Web, SNMP, Command Line Interface, or Telnet Interfaces which are complimented by RakworX Centralized Management platforms using Data Center Expert, Operations, Capacity, and Energy Efficiency
LED display	Indicate the temperature/humidity in the miniPOD system
Integrated with RakworX products	Integrated RakworX rack, coolings, PDUs and cable management products
Scalable and flexible	Prefabricated modules allow for scalable growth of IT infrastructure and flexibility to adjust the design and size of future phases of deployment. RakworX miniPOD aisle system and PDU also can integrated with other brand cooling , racks.
Simple and fast	Prefabricated modules are designed and built to precise specifications in our factory which arrive on side ready to deploy and significantly reduces installation time and cost.
